

The Ventrac Slope Degree Indicator is an excellent tool for showing the grade of the ground and how well the Ventrac performs.

The indicator is marked to show safe operating limits. The white area is for single wheels and the yellow area for dual wheels. The orange area indicates running at a dangerous degree angle and is not advised.

The Slope Degree Indicator easily mounts on all 4000 Series dash panels and is held securely by closing and latching the hood.

Specifications

Stock Code	70.0109
Shipping Weight	3 Lbs (1.36 kgs)

Standard Features:

- Easy installation
- Gives immediate safety Feedback
- Rugged construction

Note: Refer to Tractor Operator's manual for maximum angle of operation.
