Product Feature EXCAVATOR BUCKETS

Connect to the front or rear: The Ventrac excavator buckets can be mounted to the rear of Ventrac 4000 series tractors equipped with a three point hitch and 3-N-1 Adapter.

Ventrac Excavator buckets get down and dig to get your work done moving soil, debris, mulch, and more.

Excavator Buckets **HJ SERIES**

HJ Excavator bucket attachments can haul, dig and excavate various materials as well as cut sod. Designed with two cutting edges to give you more flexibility. The serrated cutting edge works well in hard soils and serious excavating. The smooth edge is great for peeling back sod at a desired depth.

Excavator Advantages:

- Dual cutting edges for greater uses
- Can also be used for removing sod
- Innovative design allows for forward or reverse excavation
- Optional rear operation with 3-N-1 adapter & 3-point hitch
- Excavates and hauls material all in one attachment
- Ruggedly built for high performance
